GALACTIC FIREBIRD

LOADING

Load Kansas Basic programs with the command CLOAD only. Do not use any file name etc.

Load machine language, system programs under the SYSTEM method as described in your manual, using the file name which is printed on the cassette or shown in the instructions. When loaded simply type ln / and press the Enter or New Line key.

If a Memory Size is stated, type in immediately after switching on before pressing any key.

The tape has two copies of the program on each side with each side recorded at a different level.
